3 Patents

SAFECELL 360 WIRELESS POLICY ENFORCEMENT MANAGEMENT (WPEN) SOLUTION

Issued May 9, 2015 • us 14/274,429

The invention includes a method and system for providing a user of a mobile device with a set of applicable legal, company policies or safety information based on the global positioning system (GPS) position of the mobile device and a set of predefined policies. The mobile device may be an of several devices including, but not limited to a, cell phone, tablet, or other electronic device. The provided set of applicable legal, company policies or safety information can comprise various information including, but not limited to, restrictions on the use of the cell phone, potential fines for cell phone use, potential dangers, personal protective equipment, prohibitions, guidelines and the like.

The patented solution has been developed to allow EMM/MDM solution providers the ability to provide enterprise employees and consumers to address the growing issue of distracted driving via their existing EMM/MDM solutions.

"APPARATUS AND METHOD FOR DISSOLVING AND DISPENSING SOLUBLE COMPOUNDS

Issued May 9, 1995 • us 5,413,280

A method for dissolving and dispensing a soluble substance into a liquid stream being dispensed downstream through a flow restricting device, the method utilizing a container mounted to a base member having a through-bore and entrance and exit orifices providing fluid communication between the through-bore and the container, the method comprising the steps of:

placing the soluble substance into the container;
attaching the container to the base member;
positioning the base member beneath the container;
connecting the base member to a liquid source;
connecting the flow restricting device downstream of the base member;
providing a liquid stream to the through-bore of the base member; and
pressurizing the container.

[See patent](#)**CELLULAR PHONE SOFTWARE APPLICATION TO SELECTIVELY DETER PHONE USE**

Filed Apr 23, 2010 • us 61/327,282

The objects described above and other advantages and features of the invention are incorporated in a method and apparatus that provides positive, behavior-modifying reinforcement for deterring cell phone use, and in particular, text messaging ("texting"), while 20 driving. In a preferred embodiment, the invention is embodied in at least one SafeCell software application in combination with a cell phone, smart phone (such as an iPhone® or Android® (device), or personal digital assistant ("PDA") (such as a Palm Pilot® or Blackberry® device), hereinafter simply referred to as a mobile phone, and a computer server that communicates with the end-user SafeCell software application(s).
